1. Claims 1-22 are presented for examination.
2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. § 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

or

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

3. Claims 1-22 are rejected under 35 U.S.C. § 102(e) as being anticipated by Duimovich et al. (Duumovich) Pub. No. 2002/0052947.

4. As to claims 5, Duimovich teaches a networked computer system comprising:
 - (A) a first computer system (Director Server Site 120, figure 1; page 2 para [0033]);
 - (B) a second computer system coupled to the first computer system via a network (end user site 50, figure 1; page 2 para. [0033], the second computer system comprising:
 - (B1) a performance data collection mechanism that collects performance data for the second computer system (page 2 para. [0033]);
 - (B2) a performance data transmission mechanism that, when enabled, transmits at least a portion of the performance data to the first computer system (page 2 para [0033]; page 5 para [0057]); and
 - (B3) a performance data access mechanism that allows access to the performance data by a user of the second computer system only if the performance data transmission mechanism is enabled (page 3 para [0039-0041]).
5. As to claims 6, Duimovich teaches the first computer system comprises a vendor computer system and the second computer system comprises a customer computer system (page 3 para [0036]).
6. As to claims 7, Duimovich teaches performance data comprises data collected by an operating system (page 3 para [0037]; and tables 1-2 begin on page 3).

7. Claims 1-4 and 8-11 have similar limitations as claims 5-7; therefore, they are rejected under the same rationale.
